

Post 16 Maths at Phoenix

In order to support you in the preparation for 6th Form courses in Maths, I have put together a work pack of key topics that would assist you in the courses next year.

Normally we would run a series of transition lessons in the summer in order to assist in this process, but unfortunately that will now not be possible.

There are 2 sets of activities for A level

Year 11 to A level transition work.

All of the EdExcel (the exam board that we use for A level) materials are in this [folder](#) as well as an extra practice questions with video compilation that I have put together in this file [here](#).

I would recommend doing the materials from the exam board after you have done the others – the more that you can do the fresher that you will be for when the course kicks off 😊

Core Maths

This is a completely new course. If you signed up to do this then you will majorly benefit from having a go at the tasks that I have put together [here](#) for you.

Should you need any help, advice, support or anything else to do with Maths in the 6th Form, then please contact either Iain.Eglinton@phoenixcollegiate.co.uk or Lyndsey.Sturgess@phoenixcollegiate.co.uk

Good luck!
